

FISHY FACTS

There are over
25,000
species of
fish!

The whale shark is the
largest fish in the world.

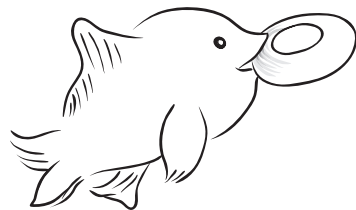

Our absent-minded professor can't seem
to remember what a seahorse is.

Help him out by discovering 5 interesting facts
about seahorses, and list your findings below.

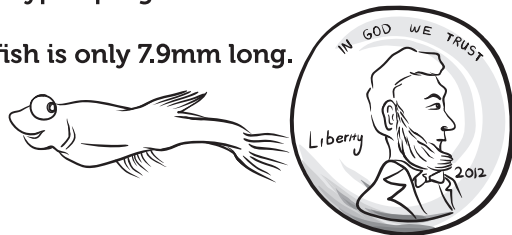

1. _____
2. _____
3. _____
4. _____
5. _____

Goldfish, one of the earliest fish to be
kept as pets, were first domesticated
by the Chinese many centuries ago.

The smallest fish in the world is the
Paedocypris progenetica.

This fish is only 7.9mm long.

The amazing Exocoetidae family
of fish are known for their ability
to fly. They developed this gliding
ability to escape from their many
predators.

Bonus activity: Create your very own drawing of a seahorse.
